Buffalo Grass

Multi-Season Tufts

SILFLOR 

Buffalo Grass

Buffalo Grass Tufts... These new tufts have young seasonal tone grasses growing at the base with last years longer dead and dry growth sprouting from the center. Tufts are mounted on an invisible base using the secret SILFLOR® process that causes the tuft to stand up and feather outward. Tufts may be placed individually or peeled off in random clusters. Full sets include two sheets of 2-4mm medium and 4-6mm tall. Each 6"x 9" sheet contains over a hundred tufts. All colors are compatible with our regular SILFLOR® mats. Now available in single 'Silflorette' Mini Packs.

X-Large Tufts

10mm-Tall Economy Grass Tufts

When we asked **Heki** to produce a taller tuft for the American market, they enthusiastically said **YES!** With their exceptional eye for natural colors, they developed a range of 10mm tufts featuring a unique blend of complimentary grass tones for just about any scene. Sold loose in a pack of 50, each tuft is perfectly formed with a natural "fountain" tuft look. Use these tufts as individual on dry soil or hard surfaces. Also use them to accentuate short grassy areas to give a more wild look. We recommend using **Tac-E-Glue** Latex Glue for best results. See matching **Heki** X-Large Pathways on page 12.

Straw Grass Tufts

The coarse grass tuft everyone has been waiting for. **Straw Grass Tufts** are coarse tufts of natural straw bound together at the base with a thin almost invisible mounting cement. Each bush cluster is approximately 5/8" diameter in width when fanned out. 1/2" tall (12mm) will work with most scales. 30 tufts per pack. This foliage features highly realistic miniature green grass tufts and is perfect for filling sparse areas, outlining perimeters, or creating barriers. Once detached, they can be effortlessly affixed to your scene with water-based white glue. Now you can make the most realistic diorama, school project, train set, and more with these detachable **Straw Grass Tufts**.

SILFLOR

Grass Pathways

Create Rough Edged Country Roads and Rustic Dirt Trails

Grass Pathways lets you create incredibly realistic rustic dirt lanes and paths with minimal effort. The long strips are designed to edge each outer side of the path. By breaking up the strip or using Prairie Tufts, you can create the center grass between the wheel ruts. SILFLOR® grass is mounted on a ultra-thin transparent base using the patented SILFLOR® process that allows the grass to stand up and feather outward just like the real thing. Each has sixteen 8½" strips. Available in 2mm, 4mm and 6mm heights. All colors are compatible with our regular SILFLOR® mats, Tufts and Buffalo Grass®.

TuftGrass

TuftGrass features a nearly invisible *Ultra-Thin 'Micro-Perf'* Stippled Backing that will easily separate into large static grass patches or the smallest 1/8" tufts. No waste whatsoever! Tear randomly and for a "patchwork" layered look. Blend with sand or sifted soil. Ideal for dry savannah look. Natural toned static grasses are blended for the most realistic appearance. **TuftGrass** sheets are 17½" x 6½".

'Micro-Perf' Backing
Ultra-Thin Stippled Back Tears with a random edge for a more realistic seam.

HK1840 Savannah TuftGrass Olive and khaki green 6mm grass patches surrounded by short 2mm dark tan Micro-Tufts. Features the **NEW Micro-Perf Backing**. \$15.99

HK1841 Spring Tone TuftGrass Spring green and tan 6mm grass patches surrounded by green and gold Micro-Tufts. Features the **NEW Micro-Perf Backing**. \$15.99

HK1842 Summer Tone TuftGrass Medium green and light green 6mm grass patches surrounded by tan and gold Micro-Tufts. Features the **NEW Micro-Perf Backing**. \$15.99

HK1843 Moorland TuftGrass Dark green and medium green 6mm patches surrounded by dark green and brown Micro-Tufts. Features the **Micro-Perf Backing**. \$15.99

TuftGrass The **Micro-Perf Backing** tears incredibly easy. This allows for a more natural edge that will blend better with adjacent materials. Use a 'patchwork' approach. It is natural at first for novices to only tear along the thin Micro Tufts, but tear through the tall patches as well. Remember, every part can be used! For large areas use spray adhesive. For small detail areas use white glue. Blend-in natural soils or ground textures. Fix with Matte Medium.

TURFgrass

NatureColor Series

Heki

NEW TURFgrass static grass mats have the textures and appearance that will set the scenic standards for years to come. 5mm tall grasses are supported on Heki's Ultra-Thin '**Micro-Perf**' Stippled Backing that easily separates into large grass patches or the smallest 1/8" tufts. The best part of **TURFgrass** is that it lays flat for a fast patchwork application. There is no waste! Even the smallest piece can be used as tufts and grass patches. All four colors work well with most every static grass mat and tuft we offer. **TURFgrass** sheets are 17½"x 6½".

Ultra-Thin Stippled Back Tears with a random edge for a more realistic seam.

Large 17½"x 6½" Sheet

HK1860 Meadow TURFgrass has a blend of light green, olive and khaki tone shadow contrast. Tremendous dimension! Features the **NEW Micro-Perf Backing**. \$15.99

HK1861 Pasture TURFgrass has a natural multi-tone pattern featuring medium green, khaki and brown 5mm tall grasses. Features the **NEW Micro-Perf Backing**. \$15.99

HK1862 Summer TURFgrass Another multi-tone 5mm mat composed of medium and dark green and golden grass highlights. Features the **NEW Micro-Perf Backing**. \$15.99

HK1863 Savannah TURFgrass A dry grass tone just before it dries completely to straw. Gold tones with a subtle light green highlight. **NEW Micro-Perf Backing**. \$15.99

TURFgrass tears incredibly easy. This allows for a more natural edge that will blend better with adjacent materials. Use a 'patchwork' approach by utilizing several similar tones and additional textures such as TuftGrass and Buffalo Grass. Remember, every part can be used! For large areas use spray adhesive. For small detail areas use white glue. Once glue has set, blend-in natural soils or ground textures. Fix with Matte Medium. We recommend leaving the white silicone backing on just before using. This will avoid contaminating the sticky back with foreign debris.

StructureGRASS

Multi-Depth Random Structured Grass Material

NEW groundcover mats are created by meticulously layering up to 14 different scenic textures to give a realistic full-depth appearance. Each ready-to-use mat is composed of a variety of soils, gravel and sand, grasses, ivy, weeds and wild grass tufts. Each mat measures 11½" x 7½". **StructureGRASS** mats are individually made by hand to produce a natural random looking groundcover. This is the best you can buy!

StructureGRASS contains multiple layers of scenic textures which may be "peeled-off" in layers to achieve a variety of ground turf effects. Measures 11½" x 7½".

SILFLOR

Cow Pastures

Just when we thought *Silflor* couldn't get any better, those scenery gurus at *MiniNatur* have developed a new multi-depth grass process that takes textures to a whole new dimension. **Cow Pastures with Tufts** begin with a short 2mm base grass and insert 6mm tall tufts randomly throughout the mat.

Pastures with Molehills (or 'Cow Pies') carry things a little further by adding little brown deposits on the pasture. Both pastures match perfectly with the entire *Silflor* product line including *Prairie Tufts* and *Grass Pathways*.

NEW GRASS MATS are styled after the popular 'Pot Toppers' touted so frequently on the internet. Now available in a more practical and convenient economy mat. These mats have surpassed all the textures and details of the original. These mats have a thick polyester fiber base which adds contour to the grass. The fiber is easily cut with scissors. Blends effectively with all other brands of static grass mats and tufts. We suggest using a Web spray or a solvent glue.

SILFLOR

California Golden Grass

The **California Golden Grass Mat** features 6mm tall golden rayon-static grass mounted on the same high quality invisible backing as the other Silflor mats. Each mat measures 12" x 19". As with all Silflor mats, the Golden California Grass Mat is effective when torn or cut into clump-like 'bunch grasses'. The grass bunches can then be grouped together in clumps or spread out amongst and around other hardy vegetation in areas where other plants wither.

FlockStar XL

Professional Static Grass System for 10mm Grasses

FlockStar XL is destined to be the Static Grass System by which all tools will be measured. Heki has completely re-engineered the static concept where the static ring is at the bottom of the hopper. By flip-flopping the design, the distance between the device and the grass surface is close-up to less than a half inch. Very little static charge is dissipated. With the addition of a metal screen, the charge is amplified even greater making even the shortest grasses stand up.

The external static generator will accept up to 22 volts of incoming power producing a much higher static output. A simple toy train transformer is all that is needed. You can now adjust the power for specific flock lengths.

The open back of the hopper will allow you 'to fill on the fly' and change colors and grass lengths for a more natural grass effect. Best of all, the **FlockStar XL** can use Static Grasses from 2mm-12mm tall. All brands of static grasses and blends will also work perfectly.

The **FlockStar XL** kit includes: the powerful static generator, the grass hopper with metal screen, two **Precision Application Discs**, a 30" power and 30" ground wires and a sample of 10mm static grass. A tool worthy of the investment.

GRASSmaster 2.0

NOCH Static Grass Gun

GRASSmaster 2.0 is a true "electrostatic" grass device that can create a thick plush 'stand-up' carpet of grass from 2mm (1/16 inch) to 6mm tall (1/4 inch) and now **NEW 12mm X-Tall** (1/2 inch)! Newly improved with 20% more static charge, a full 20,000 Volts of static power to cause any grass blade to stand to attention!!

Leave it to German technology to engineer an applicator with such simplicity that it utilizes an everyday 9-Volt transistor battery to create enough static charge to apply to even the tallest grass follicle.

The **GRASSmaster 2.0** is built to German quality standards. Constructed with metal handle, a long heavy rubber coated ground wire and chrome plated "alligator clip". The deep plastic grass hopper cup insures safe operation even for the most clumsy modeler. The red power light alerts you to needless battery drain.

Included with the **GRASSmaster 2.0** are three special interchangeable screens specifically designed for maximum speed and coverage: fine for 2mm short grasses, medium for 4-6mm tall and large for the new 10-12mm static grasses. (An optional **Concentration Nozzle** set with 3 internal screens is available NH60132 See adjacent fold-out!)

The **GRASSmaster 2.0** kit includes the **GRASSmaster Static Gun**, three stainless steel wire mesh screens, 9-Volt battery, instruction booklet and a small 2 oz. sample pack of 2mm static grass.

FlockGrass^{XL}

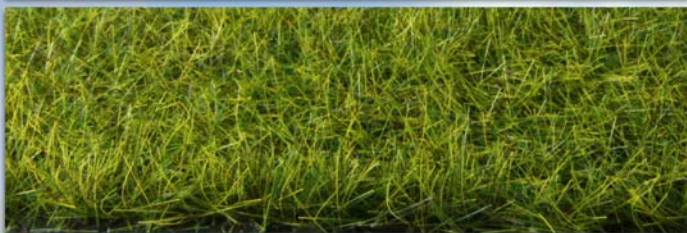

Professional Static Grass System

NEW 10mm XL-Long static grasses are, in our opinion, the finest available. The super-thin rayon folicle (426-denier thick to be exact) gives a more fine scale look than other grass products. Folicles measure approx. 3/8" tall. Each 1.75 oz. package will cover with normal density 4-ft² area. All Heki grasses will work in most of the second-generation Static Devices that produce 20K Volts or more.

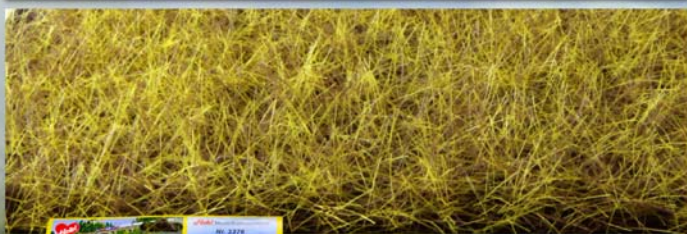

HK3376 10mm XL Spring Meadow Static Grass Our best seller! A natural light green tone blended equally with yellowish greens. A hint of brown gives contrast. 1.75 oz. Approx 2 cups.

HK3376 Spring Meadow \$10.99

HK3377 10mm XL Summer Meadow Static Grass Medium green tones blended with golds and tans. A little dark green gives contrast. 1.75 oz. Approx 2 cups.

HK3377 Summer Meadow . \$10.99

HK3378 10mm XL Autumn Gold Static Grass Golds, tans and beiges mixed evenly to give this blend a seasonal dry look. Makes great wheat fields! 1.75 oz. Approx 2 cups.

HK3378 Autumn Gold \$10.99

Try tinting your glue with watercolor or color pigments. Select a natural soil tone for the region you are modeling and mix with your glue. Test first! When dried, the glue will add additional depth and dark contrast to your grass.

DecoGrass® is a fine 2mm tall blended static grass fiber material that requires **NO Static Device**. The short grass follicles are supported vertically by a nearly invisible fiber backing giving it a clingy quality that almost self-sticks. Ideal for layering over existing boring foam turf scenery. When pulled thin and wispy, it will easily give a fresh new "static look" to any scene. Works well with all scales. Available in 9 realistic color tones. **DecoGrass®** sheets measure 11"x 5½". *Remember, when pulled apart, a sheet will cover up to 10 times the surface area!*

Scenic Foams and Ground Textures

Flock & Turf

Green Scene Scenery

We listened to our customers many years ago and followed their suggestions for packaging our foam which later many followed. We were the first to develop a **Shaker/Sifter** bottle. Then we thought about a **1/2-Gallon Jumbo Refill**. Then our commercial customers needed a **Mega 5-Gallon Bucket**. We got it! **But our latest idea is by far our BEST!**

NEW ECO-Paks!

We at Scenic Express are thinking green with the new 48oz **ECO-Pak** packaging. (That's a full 1-1/2 quarts!) Not only will the new **ECO-Paks** reduce plastic waste pollution and train room clutter, it will also reduce the waste in your pocket! **ECO-Paks** offer **50% More** material than the traditional 32oz shaker for the **SAME PRICE!**

New Color Coded Caps

We now offer our popular Flock & Turf products in color-coded caps for quick identification. Great idea for those who have cluttered work spaces... like all of us!

- **RED** for fine turf applications. **RED** cap offers a smaller 7-hole sifter/shaker for smaller textures. *The bottle is flexible for squeeze blower application!*
- **GREEN** for coarse turf applications. **GREEN** cap offers a larger 3-hole sifter/shaker for coarse textures. *This seems almost too practical, don't you agree?*
- **YELLOW** for blended textures. **YELLOW** cap offers a larger 3-hole sifter/shaker for more coarse blended textures.

Heki Foliage is a multi-layered foliage material. They first begin with a natural tone fiber matrix mimicking a natural branch or vine color. They then apply a dark tone base layer of coarse foam. Next, to give contrast, they apply a slightly brighter tone color for highlights. The end result is a highly dimensional foliage providing greater visual depth creating highlights and shadows. Use as you would any other pull apart foliage product and you'll see instantly the superior results. Sheets measure 11" x 5 1/2".

Pull-Apart Plant Clusters

WOW! Is this stuff TERRIFIC!! We've created a new generation of leaf foliage that has varying thickness from 1/8 inch to 1 inch thick. We cut the polyfibers especially short so when pulling apart it creates a smaller, more manageable cluster. No stringy fibers to annoy you. No more squashing your foliage when feathering & blending edges. **You're simply gonna love this stuff!**

Light Green Pull-Apart Clusters

Light Green blend of **SuperLeaf™** supported on a thin brown polyfiber structure base. Polyfiber strands have been milled to 5/8" long for easy pull-apart application. A layer of simulated soil appears on the underside of the material. Sheet measures approximately 6" x 11".

HOW-TO: Using scissors simply snip off a thin stalk parallel with the thread grain of the material. Fold in half, pinch and crease center. Apply **Beacon's 3-IN-1 Advanced Glue** to the base and immediately place into position. Depending on the other Silflor materials or ground covers you're using such as Prairie Tufts or Buffalo Grasses, you may want to place them first then blend in the goldenrod.

TIP! Goldenrod dies quickly after the first frost and the renowned bright yellow flowers become gray and fluffy for seed dispersal.

SILFLOR® Flowering Meadows

Flowering Meadows are as easy to use as our popular grass mats. Take note how grasses really grow. Wild fields *never* have a 'golf course' perfect look... at least not that we have seen. We observe a patchwork of weeds, tones, colors, heights and textures. Look the next time you're out... You'll see what we mean.

SILFLOR® Flowering Meadows Sampler Pack

SILFLOR® Flowering Meadows

A sampling of all four **Flowering Meadows**. The perfect assortment to try and experiment with the magic of Silflor. English Ivy Foliage

Whether you'll use this evergreen for climbing or ground-creeping, you'll have no problem keeping this 'creepy' ivy contained to those areas that require a little ornamental class! The English Ivy's signature palmate five-lobed leaf structure displays its own unique quality compared to other leaf foliages. Easy to use! Just cut, tear or pull apart to create the tangled vines and glue to your surface. Available in 'Silflorete' packs.

Ditch Weeds

Foliage Detail Strips

NEW Ditch Weed is your solution for those hard to scenic areas such as between double mainline tracks or along roadside berms, and abandoned building foundations. Fill those narrow spaces that are too tight against your railroad tracks where any loose foliage may interfere with your pike's operation. **Ditch Weeds** are clusters of brown denier foliage firmly fixed on a low-profile earth-tone base and delicately flocked with **SuperLeaf** Flake Foliage. The result is a super realistic self-feathering scenic texture.

Ditch Weed Sets contains 18 inches of strips: two 6" long pcs. and three 2" long pcs. The average width is approximately ¾-inch.

JTT Pro-Elite Trees

Pushing the envelope on realism, the **Pro-Elite** collection begins with JTT's patented, twisted wire process, and then takes each portion of the tree to new heights. They've crafted the most genuine bark ever seen on a scale tree. This textured bark adds a third dimension to trunks and branches, a gnarly, rough hewn, knobby surface. A two-tone paint technique simulates aging, while exposed root is superbly detailed. Branches are robust and defined with full, yet airy, multi-colored leaves. Multiple sizes per pack- 3" to 6" tall. With JTT... only life is more authentic.

Aspens

Western Quaking

Quaking Aspen Trees

Quaking Aspen is one of the most well-known tree species in the western United States and Canada. It is found from the northern limit of trees in northwestern Alaska through the western United States and into northern Mexico. It favors conditions near streams and rivers, in meadows and in canyon rocks. Quaking aspen is a beautiful poplar tree that makes the western theme great to model. It has creamy white bark, bright green leaves, each leaf flipping in a different direction, making the tree or grove seem to shimmer and murmur in the breeze. In autumn, aspen leaves turn yellow with a tinge of orange and gold, and in the clear sunlit places it prefers, its colors blaze in brilliant revelry.

Premier Scale Pines

Trees that will soon raise the bar! What more can we say but "exquisite". We are certain that these trees will soon set the standard for quality and affordability. Introducing our new line of **Scale Trees**. Handcrafted here in America, each tree has a distinct character; each an individual work of art! To start with, how about Ponderosa Pines, Giant Sequoias, Western Lodgepole Pines, Appalachian Green Spruce, Blue Spruce and Conifer Pines. Sizes available to meet the demands of HO-Scale and O-Scale modelers.

Ponderosa Pines

Narrow gauge modelers are going to love these! A familiar name and a popular tree.

Ponderosa Pines, commonly known as the **bull pine**, **blackjack pine**, or **western yellow pine**. It's an extremely expansive pine tree native to western United States and Canada. It grows in temperate altitude woodlands from British Columbia southward and eastward through 16 western states. Known for its beauty and quality lumber products.

Handcrafted real textured wood trunk, plastic limbs with static needle textured flock. Available in six sizes. Has a tapered spike for easy planting.

Static Needle Blend

What makes Scenic Express pine trees stand out from the rest is our use of 2mm static needle to provide a texture that gives every tree a natural appearance.

Grand Central Gems Lodgepole Pines

Outstanding quality that would appeal to even the most discriminating scale modeler. Hand carved natural cedar trunks and finely detailed pine boughs.

Lodgepole pine is a species which grows throughout the west, as far north as the Yukon and south to Baja California. It ranges east to the Black Hills of South Dakota and west all the way to the Pacific Ocean. Sierra lodgepole pine typically grows to a height of 90 to 100 feet and an average diameter of 16 inches or greater.

Easy to Make **SuperSage**™

SuperSage combines the highly intricate branch structure of **SuperTrees**™ with the legendary texture and detail of western sage brush to produce the 'Perfect' foreground tree. Easy to make. Recommended for HO and O-Scales. **Value Pack** and **Value Case** include sage brush and **SuperTree**™ branch material. Sample packs of our new **SuperLeaf**™ Flake Flock* and **Täk-E-Glue**™ latex adhesive* come with each **Value Pack** and **Value Case**. Illustrated instructions included. (*Additional leaves and adhesives are recommended.)

EX0240 **SuperSage**™ **Value Pack** (makes 9 trees*) \$29.98

EX0242 **SuperSage**™ **Value Case** (makes 40-45 trees*) .. \$129.98

SuperSage™ can be made using 4 basic steps with simple tools and materials.

Step #1: Glue base **SuperTree** branches to Sage Brush. Layer as you work upward.

Step #2: Place a "top-crown" **SuperTree** crest to the top of the tree to finish shape.

Step #3: Spray paint the tree a natural bark tone; brown, gray or eggshell white.

Step #4: Flock using **SuperLeaf** or Noch Leaf Flake. Fix with **Täk-E-Glue**™.

Starter Kit SuperSage™

SuperSage Starter Kit

Learn the **SuperSage** techniques by experimenting hands-on with this easy to make kit. Included with the **SuperSage Starter Kit** are all the materials necessary to produce a full variety of trees.

miniatur Conifer Tree Kits

Beacon's 3-in-1 Adhesive
Fast grab clear adhesive. 4-oz. bottle.
SC0314 3-in-1 Glue Adhesive \$3.99

The New **miniatur** Conifer Kits come with positional wire trunks which have a unique vinyl coating that simulates a weathered bark texture. Also with the kit is several sheets of pine horsetail foliage; enough to complete all the trees. We recommend using **3-in-1 Glue** as your primary adhesive.

- 1: Begin by gently twisting the wire branches giving the tree its shape and dimension.
- 2: Snip the Horsetail foliage to the necessary sizes and shapes according to the enclosed directions.
- 3: Apply **3-in-1** to the top portion of the branch.
- 4: Drape the appropriate length of Horsetail over the branch. Then pinch the material, folding it in half, making the pine bough.
- 5: Detail the top crown with small pieces of Horsetail.
- 6: With fine scissors, snip the boughs to give individual branch textures.

Green Spruce

Green Spruce Kit The graceful spires of this spruce are a familiar sight in the western USA and Canada. Found usually in higher subalpine regions. Similar to the **Red Spruce** found in the Eastern Mountain States and down into the Southern US. The two trees are often mistaken for one another. The Green Spruce is a favorite Christmas tree.

- MN57302** 3" Green Spruce Kit - 4 trees **\$28.49**

Nordic Fir

Nordic Fir Kit This is the most common and widespread fir in North America: there are several different geographical varieties. Its habitat ranges from mountain streambeds and bottomlands with hot, sunny summers and cold winters. Because it is slow-growing, the Nordic Fir has also attained some popularity as an ornamental tree.

- MN57602** 3" Nordic Fir Kit - 4 trees **\$28.49**
- MN57612** 5" Nordic Fir Kit - 2 trees **\$32.49**

Weathered Green Spruce

Weathered Green Spruce Kit

Not every tree in nature is perfect. Trees become distressed as a result of hard weather, disease and insect infestation. Needles die and turn brown and limbs break off. This kit provides that natural look most modelers don't consider. The instructions illustrate how to apply the several tones of horsetail foliage to achieve an exceptionally realistic tree.

Super Leaf

Scale Model Leaf Flake

Super Leaf Scale Model Leaf Flake

NEW A multi-dimensional leaf flake that has a stippled surface which gives volume to foliage and provides natural highlights and shadows on tree branches, shrubbery, vines and ground covers. Simulates the shimmer of natural leaves blowing in the wind. The IDEAL product to compliment SuperTrees. IDEAL leafy ground cover too!

SuperLeaf is a plastic flake that is colorfast and will resist fading in natural or fluorescent lighting. Over 26 colors to-date, mix and blend several colors to meet the specific tones your layout needs. Add a touch of color or dull it with dry leaf litter.

SuperLeaf is available in three package units: a 16oz. **Shaker Bottle** with sifter cap, an **ECONOMICAL 24oz ECO-Pak** and for the really big layouts, a 1-gallon **SuperPak**.

Leaf Flake Foliage

The genius of SILFLOR® as done it again!
Examine this foliage a little closer and you'll realize that the flakes are actually a five lobed leaf! Never before has such foliage detail, with this many seasonal tones, been available to the average modeler.

SILFLOR

Leaf Foliage Sets include three sheets of leafy foliage on super-fine polyester support. Sheets measure 3½" x 6" each. It is as simple to use as your regular foliage, simply cut a portion and tease apart, apply glue and drape over the scene.

Broadleaf Maple Foliage

(Shown Right) The Broadleaf Maple is perhaps the most colorful of all the maples in North America. This tree is found throughout rural countrysides. Highly prized as ornamental trees for their brilliant autumn foliage.

SILFLOR®

Leaf Horsetail Foliage

Using Leaf Horsetail Foliage is a simple process but by following these simple steps you will produce the best tree you'll ever make.

1 & 2: Begin by cutting the foliage sheet into one inch square patches. Handle the material gently so not to flatten the loft of the material.

3: Snip randomly into the squares to separate the fibers. Snip all the way around but allowing the patches to remain as one piece. Tease and feather the material to make a branch-like limb.

4: Apply glue to tree armature. Beacon's 3-IN-1 or Web Spray works well. Allow glue to set a minute and begin placing Horsetail patches at the end of the branches in a horizontal pattern.

5: By using small and frequent patches, the result will be a light and delicate appearing tree.

EASY TREE KIT!

- 1: Simply twist the individual limbs of the tree to give a natural dimension and full appearance. Paint and weather trunk for natural bark texture.
- 2: Apply adhesive. **Web Spray Adhesive** BO1526 for larger trees. **Tak-E-Glue** SE0041 is recommended for smaller tree details. Immediately dip, sprinkle or roll the tree in foliage supplied. Allow to dry. Fix with Matte Medium for permanence.
- 3: Plant your trees by making a small tap hole in your platform. Place a small amount of glue (hot glue works well!) in the hole and insert stem. Allow to dry.

PEEL 'N' STICK

Flexible Stone Walls

This is definitely a 'No Brainer'

A series of flexible multi-scale wall patterns from Chooch featuring a super thin 1/8" vinyl casting making it not only flexible but extremely easy to cut with scissors or hobby knife. The added convenience of a "Peel & Stick" backing makes construction fast. Interlocking dovetail ends allow unlimited length. All walls come lightly pre-weathered and may be super-detailed with simple acrylics. Wall swatches below shown actual size.

Make a Simple Arched Viaduct

Consecutive 'PENNSY' Portals make excellent raised viaduct. To create the vault, first trace portal's profile on 4" of stacked Styrofoam. Cut out vault with long knife or coping saw. Adhere portals with Flex Paste #WD1205. Allow to dry. Curve inside vault to match stone textures OR glue inside NOCH Embossed Masonry Wall Paper #NH57720 Basalt. Apply Seam Sealers at Butt Joints in the same manner as above.

O/HO-Scale Viaduct front

Made of super detailed urethane foam it may be cut, shaped and weathered with very little effort. To bend a gentle curve simply heat in a conventional oven at 250° for 2-3 minutes until material becomes soft and pliable. Bend to desired shape and let cool. The piece will retain the new shape. Weather as usual.

PennOhio Concrete Masonry System

Our newly redesigned **PennOhio Concrete Masonry System** will please the demands of the every discriminating scale modeler. The original prototype was modeled after the engineering styles of several major railways from the early part of last century. **PennOhio** is ideal for contemporary railways throughout Eastern and Western USA.

All **PennOhio** components are made of light density foam that allows easy cutting and alterations. All have a factory gray primer finish.

RockFoil

Flexible Plastic Rock Sheet

Flexible Rock Material just made life a lot easier. Quick • Affordable • Effortless Rocks

Rock Foil is a highly textured plastic rock pattern sheet. When shaped, it forms an exquisite cliff face with minimal effort. The .060" thick tempered plastic is embossed with a deep rock texture and when 'crumpled', it allows the modeler to achieve realistic and intricate stonework. Stone-gray base color with warm tone weathered highlights. All sheets will blend naturally together. **Rock Foil** works well with all scales.

How To Build Realistic MODEL RAILROAD SCENERY by Dave Frary

Scenery so realistic it fools the eye!

The book that set the standard for model railroad construction is back and better than ever.

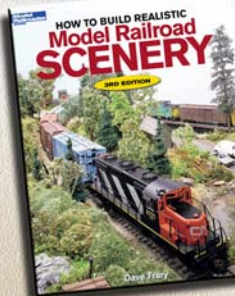

This book has been the reference guide for creating fantastic, true-to-life scenery... settings that take your breath away. Dave Frary has completely updated his text to reflect new developments in modeling materials and techniques.

Together with renown *Master Modeler*, **Bob Hayden**, Dave will take you through the most useful 'straightforward' construction techniques with plenty of illustrations and color photos. Regardless of skill, you'll end up with professional results.

Let Dave share his tips and techniques on how to:

- Build the forms and shells you need to support it
- Select and use colors, materials and adhesives
- Make convincing scale rocks from urethane **Master Casting**
- Add depth and interest to your layout through textures
- Trees and foliage for a variety of climates - all four seasons
- Ultra-realistic ponds, lakes, streams, and other bodies of water
- Build foreground scenery that will stand up to close scrutiny
- Tie your track into the scenery with natural-looking ballast

WIREFORMA

Wire Reinforced Terrain Material

A ONE STEP TERRAIN SYSTEM... This material combines the strength of a heavy wire grid bonded internally within a waterproof (so NO soak through) asphaltum barrier layer and a **NEW Elastic Crepe Textured Paper** on both sides. Just unfold **WIREFORMA** bend and form to the desired mountain contour... Wow! Imagine no need for screening or chicken wire.

The newly redesigned **WIREFORMA** now has a crepe texture which allows greater stretch and pliability. The crepe texture also adds a "tooth" for better adhesion of SculptaMold and GypsoLite. New **WIREFORMA** may be used even without any coating... just apply your ground covers directly.

HYDROCAL

CASTING STONE - UltraCal 30

The '**Ultimate**' in casting stone materials.

UltraCal 30 is rated 5½ times the hardness of regular casting plasters allowing incredibly fine castings without chipping or breaking when removing from the mold.

UltraCal 30 is a super fine silicate that picks up the finest details in the most intricate molds with sharp undercuts and difficult to achieve textures. Pour thin, lighter castings.

GypsoLite™

Blending Medium with PEARLITE

GypsoLite is the perfect blending medium recommended by the Pro's. A long 'working time' compound with Pearlite that gives a natural fine earthy texture for quick and easy blending of rock castings and large terrain coverage. Mix to any consistency: **PUTTY-LIKE** for sculpting terrain contours • **PASTY** for adhering rock castings and blending • **SOUPY** for brush applications for added 'gritty' textures. Available in a 1-gallon & 20 lb containers.

EX0050 GypsoLite™ Blending Compound Gallon Gripper Jug \$11.98
EX0051 GypsoLite™ Blending Compound 20 lb. Super Value Pack Only \$30.98**

(* **Add an Additional \$7.50 shipping surcharge per Each **GypsoLite** Super Value Pack)

TIP: To slow the curing rate of HydroCal™ add a few (2-3) drops of vinegar while mixing. This allows a much longer working time. Be careful however, too much vinegar will cause the HydroCal™ to NEVER harden!

SculptaMold™

SCULPTING COMPOUND

SCULPTAMOLD Sculpting Compound can be used for several purposes: rocks, blending rock castings, river beds ... even filling small gaps in your basic scenery. When dry, **SCULPTAMOLD** may be carved, sanded, drilled, filed ... even smoothed with a wet rag! **SCULPTAMOLD** has a long working time of up to 90 minutes. Dries overnight.

Mix **SCULPTAMOLD** with water to form a thick creamy consistency. Apply directly to moisten terrain base using pellet knife or sculpting tool. May also be brushed on for thinner, less detailed surfaces.

SCULPTAMOLD may be worked for several minutes. The slow setting allows very subtle details to be applied.

The true beauty of **SCULPTAMOLD** is that once dry, it allows the modeler to carve additional details into the terrain. Ideal for old weathered asphalt road and masonry wall textures. Paint with water based colors and wash for realistic effects.

Subterrain™

A Simple and Improved Layout System that All Modelers will Love!

Step 1

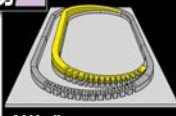

Install Risers

Install **Risers** wherever track will be laid on curves and straights. This raises the track level to the height of the **Risers**, causing surrounding areas to be lower. Modelers can quickly and easily make creeks and other low-lying areas without cutting into the layout base.

Step 2

Add Inclines

Flexible Inclines allow track to easily change elevations on curves or straights. The **SubTerrain System's** pre-cut **Inclines** (with 2% or 4% grade) remove the guesswork and complicated calculations.

Step 3

Install & Cut Profile Boards

Interlocking Profile Boards are joined with matching connectors to make a sturdy layout perimeter that can easily be cut with the **Foam Cutter** (the unique hot wire cutter) to conform to any profile desired.

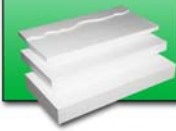

Step 4

Cut & Install Sheet Goods

Cut **Foam Sheets** with the **Foam Cutter** and use to enclose tunnels, create interior terrain profiles and form level, elevated areas for buildings and towns.

Step 5

Add Plaster Cloth & Roadbed

Form terrain with newspaper wads. Cover them with **Plaster Cloth** that has been dipped in water. Install **Track Road Bed**. Create realistic streets, roads and parking lots using the **Road System**. Then finish the layout using all the fine products from **Scenic Express**.

The **SubTerrain Layout System** consists of rigid, high-density foam products that require no power tools, hammers or nails, resulting in quick and clean construction. Installing wiring and switches is fast and easy. Easily add track risers and inclines with precise grades and any radius, for reliable train operation. Create contours, roads and crossings with this complete system of products and tools. **See our Web Site for more info! Special Tips & Techniques for O-Scale applications!**

B.T.T.

Black Track Tack

Instant Roadbed

Black Track Tack

B.T.T. offers the model railroader this better alternative to cork, vinyl or foam style roadbed for it's simple application and instant hold. Imagine track work without the use of frustrating nails and long setting glues. Simply unroll **B.T.T.** on your smooth train platform, press your track into **B.T.T.**'s tacky surface and have instant adhesion. **B.T.T.** can be cut and pieced together easily for more complex track plans. **B.T.T.** will never dry out and remains tacky for years.

B.T.T. instantly holds ballast in place too! Just spread ballast over the track ties and taper your bevel. Next, press the ballast into the tacky surface and your ballast should adhere securely. (Even though **B.T.T.** will hold the ballast in place, we still recommend that you fix it permanently with a good coating of Matte Medium.)

B.T.T. is thin, only $\frac{1}{8}$ " thick and comes in a continuous 30 foot roll. Currently available in **O-Scale**: $2\frac{1}{2}$ " wide by 30 feet and **HO-Scale**: $1\frac{1}{2}$ " wide by 30 feet.

Scale Rail Track

Black Track Tack works well with all scales. It can be slit to any size for specific gauge width. The O-Scale can be cut in half for cost effective HO applications or in thirds for N-Scale. Pieces can be layed side-by-side for switches and turnouts.

Tubular Flex Track

This type of track is where **Black Track Tack** really comes into it's own. Wooden ties grab quickly to **B.T.T.** There is no need to nail or screw your track and best of all... no more splitting your ties!

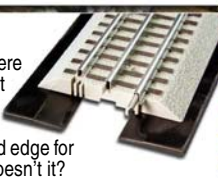

Sectional Track

This type of track is **LOUD!** **Black Track Tack** has excellent sound dampening qualities. Because it always remains supple, **B.T.T.** absorbs much of the vibrations that get amplified on your platform surface.

Snap Track

This is the 'New Kid on the Block'. Here is our simple solution for a quiet roadbed. Slit in half O-Scale **Black Track Tack**. Align the two strips parallel leaving an outside exposed edge for additional ballast. Looks simple doesn't it?

Track Roadbed

Quiet Smooth Running Operation

Midwest Flexible Cork Roadbed System makes it easy to create realistic track roadbed with less work and half the frustration of other methods. Meets all stringent NMRA standards. The consistent thickness and durable strength cushions and stabilizes your track even in the most rugged terrains or foundations. The fine granular composite cork features a beveled edge for a realistic appearance. Each piece of roadbed is 3 feet long split down the center for easy turns.

Midwest Cork Sheets & Turnouts Sheet stock may be used on switches, sidings, yard and loading areas. The sheet material is the exact thickness as is the roadbed material.

WOODLAND SCENICS®

NEW Revolutionary O, HO & N-Scale Roadbed!

This roadbed product provides a quiet, smooth train operation and absorbs irregularities on your layout. It gives you a high-quality, economical alternative to other roadbeds. Track-Bed requires no pre-soaking like cork, remains flexible and won't dry out or become brittle. It aligns well with cork on any layout and is available in Rolls, Strips, Sheets and Super Sheets. For an almost seamless application, use the 24-foot Rolls. All Track-Bed comes in N, HO and O scale.

Ballast

Natural Stone • Protoscale Quality

This is the Ballast you modelers have been waiting for! Natural stone aggregate accurately graded for the most discriminating protoscale modeler. Natural color tones with blended hues for subtle contrast. We 'seal' the stone so not to darken in tone when adhesive is applied. Our Blended Ballast has six tones of gray for a smooth appearance (not a speckled 'salt & pepper' look) continued...

HYDROUS WETTING SOLUTION

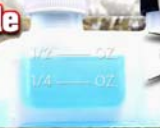

Makes 2 Gallons!
\$749

This stuff is really **WET!** In fact, **SuperWet®** goes beyond just Wet Water, it can be added directly to **Matte Medium**, acrylic & ink color washes. Quickly breaks down the most stubborn surface tension. **SuperWet®** will not produce bubbles when mixing. The 8 oz. concentrate makes 2 gallons.

EX0025 SuperWet® Hydrous Solution ... \$7.49

Measure Dispenser Bottle

Our new **SuperWet®** comes with a nifty measuring & dispensing bottle. To use, just loosen the white measuring cap and gently squeeze the required amount into the graduated chamber. Remove cap to pour the measured amount. Mix with water and spray or dribble solution.

Water Making Materials

EnviroTex Life Water Resin

Epoxy resin is quickly becoming the material of choice for most modelers because it has little odor, doesn't give off the heat in curing and is far more likely to have a hard rather than tacky surface. Creates a smooth placid body of water. Ideal for large lakes or broad rivers. Easy to mix equal part containers. Instruction manual included.

Water Gloss & Water Gel

Used effectively for years by Master Modelers Dave Frary and Bob Hayden with "masterful" results. Their techniques shown and demonstrated on their DVD **Building Waterways on Your Model Railroad** (see opposite page) make it all seem so easy! *It's really worth seeing!!*

Water Gloss and Water Gel are used to make water effects easily and painlessly. However, remember that these products are used to create the *illusion* of depth; not an actual depth.

WATER GEL Apply for the illusion of depth and waterfalls. Dries to a semigloss clear finish. May be built up in layers. Dries permanent and waterproof. Thin with water. Color with Polymer Tint or transparent watercolor. Apply topcoat of **Water Gloss** for watery glisten.

PT0146 Water Gel 4 oz. jar. **\$6.95 ea.**

PT0147 Water Gel Pint 16 oz. **\$13.95 ea.**

PT0148 Water Gel Quart 32 oz. **\$22.95 ea.**

WATER GLOSS For the glisten of wet water. Dries to a high gloss clear finish. Gives everything a shiny wet look. Use for wet rocks in stream beds & water falls, swimmers & boaters and car washes, etc.

Spray Adhesives 'Spray Glue'

Highly Recommended 'Mist Spray' & 'Web Spray'

These two glues may seem the same but in fact, they each have their own special characteristics: **Mist Spray** is the traditional 'better-quality' spray-glue that people have used for years. The only difference is the cost... ours is cheaper. Almost 25% less than the popular competition!

The other **Web Spray** has taken the scene by storm! It lays down a thick "cob web" pattern of glue that stays *pressure sensitive* for up to twenty minutes! It also has a special **Regulator Nozzle** that allows a light to heavy spray pattern. The nozzle also adjusts the pattern from vertical to horizontal stream. Best of all, it will NEVER dry-out as some spray adhesives do. It's really GREAT STUFF!!

BO1525 Mist Spray - 55 Pro-Stick Multi-Purpose Spray Adhesive 16¼-net wt oz. **\$9.99**

BO1526 Web Spray - 65 Pro-Stick Hi-Strength Spray Adhesive 17-net wt oz. **\$11.99**

Web Spray Nozzle

Regulator spray head adjusts to varying spray volume: Light, Medium or Heavy spray widths.

The directional nozzle adjusts to a vertical or horizontal pattern.

JOSEF BRANDL'S ASTOUNDING MODEL RAILROADS

There are few modelers whose skills are such that all others wish to aspire. Josef Brandl is such a man. In our opinion, he is perhaps the finest.

This book is a coffee-table style, having a minimal amount of text and countless pages of full color images. The book doesn't focus on modeling (although it does mention a few techniques) as it highlights graphically six of his most notable layouts. Written in both English and German. A truly fascinating 204 page book! Truly a remarkable modeler!!

My Life With Model Trains

Howard Zane's 2,850 square foot "Piermont Division" showcasing his artistry in model railroad building and design is acclaimed as one of the finest and largest private layouts in the country. Exquisite "eye level" photography pulls you into the world of the Piermont, over 22 scale miles of track, past the historically accurate architecture, scenery, trains, and vignettes of mythical towns in a romantic recreation of another time and place - inspired by Northern West Virginia in the ten years from the end of World War II to the mid-Fifties. You can almost hear the rumbling of trains on the tracks.

CA+ CYANOACRYLATE 'Super Glue'

Our Own Special Formula! 5-15 Second Gap Filling

We have tested and evaluated all of the important characteristics of our **CA+ Adhesives**. The results? This glue is not only clear, pure and consistent bottle after bottle, but also designed to "wick" better into scenic textures for the strongest bond possible. Medium viscosity allows for quick set but you're not rushed! If you need it stuck 'quick', the **Accelerator** really speeds the set time!

Spitfire IX Supermarine

The Submarine Spitfire IX was quite arguably one of the best fighters of World War II and was best known for its actions in the Battle of Britain.

P-51 Mustang 'The little buddy'

The North American P51 Mustang came into existence from a response from the British Air Ministry for a fighter that was able to escort well into Germany. The first flight of the Mustang was October 26, 1940, from there production would go on to number more than 15,000 units of all versions.

HO-Scale

A typical small fueling facility located throughout the country. This kit includes the laser cut building, three resin cast tanks, fencing & billboard. The scene can be "shaped" to fit anywhere on your layout.

R.J. MOONEY CO

Plumbing Emporium

This kit was based on a Bob Hayden article many years ago... originally called the "8-Ball Locomotive Works". This is a small but **HIGHLY** detailed replica of the structure... not for the novice! HO-Scale laser kit

WASHBOARD Co.

HO-SCALE 'FALSE-FRONT' STRUCTURE KIT

This HO kit measures almost 7" long & just under 3" deep. The overall height is 5". The freight doors are laser-cut, but the windows are injection-molded plastic. A couple of different versions of the front sign are included. For the first time we are introducing a new "slate" roofing shingle in this kit... we love it.

BAR MILLS BASICS

Furlow Freight & Transfer

This is just a cool little building with a unique look. Suitable for a small spur or country siding the kit has a stark & simple quality that helps to make it stand out. This kit is a bit of a "puzzle" to assemble, but an easy puzzle... and **REAL FUN** !

BM0712 Furlow Freight & Transfer
HO Laser Kit **\$22.95**

H.J. Simpson Feed & Seed

Named after our favorite Simpson... "Homer J.", this building kit is not really all that "basic". All kinds of medium- advanced features such as the loading dock & laser-cut freight doors snuck into this little kit. Perfect for "street-side" or "line-side". This kit is not so much for the rank novice... a little modeling ability may be needed.

BM0742 H.J. Simpson Feed & Seed HO Kit **\$22.95**

SHINGLES

This version of the "shingle" is "printed", and then "laser-cut"... eliminating the need for additional work on the part of the modeler. The results are consistent, and with a little extra "dry-brushing" and detailing the shingles can be given even more of a craftsman-type look! Available in HO scale, and in 2 different base color patterns ! Two sheets per pack measuring 8" x 5". Glue is required.

miniNatur Crop Rows

These guys think of the coolest things. Introducing **Crop Rows**, their latest creation. After a long search to find the perfect combination of true-to-scale appearance and ease of installation, they have developed this simple and effective crop row material. It begins with a flexible textured cord base and then adheres a static grass flock using the secret "Silflor" Static process that makes grasses like alfalfa and wheat appear to grow vertically. They've also developed rows of leafy vegetables by adding a tiny leaf to the stalk creating crop rows such as soybeans, potatoes, sugar beets, and lettuce.

As with all MiniNatur® products, **Crop Rows** are available in four seasonal colors. Each pack contains 20 individual rows, each 8½" long. Enough to plant an area approximately 8" x 8½". (Actual size may vary by scale and/or furrow spacing)

Tile Patios

Damascus Tile Floor

Highly detailed terra-cotta ceramic tile floor simulating a classic arabic mosaic pattern. 2 sheets per pack. BH7414 \$3.99

Damascus Tile is printed on thin (2mm) matte finish paperboard to allow easy cutting but stable when gluing. 2-sheets per pack. 8 1/4" x 5 3/4".

Tuscan Tile Floor

Italian design at it's best. From plazas of Florence this tile pattern will emphasize any classic setting. 2 sheets BH7413 \$3.99

The superior printing shows all the tile's subtle handmade imperfections and weathered details that were present on the original tile floor. 2-sheets per pack. 8 1/4" x 5 3/4".

Cracked Asphalt

Decaying asphalt pavement detailing the deep potholes, weathering stains and corroded manhole covers. BH7416 \$3.99

Incredible detail! Super fine printing brings out the depth and textures of this decaying pavement. 2-sheets per pack. 8 1/4" x 5 3/4".

The SHACK PACK

What makes us tout the kit is the fact that each of the three structures included in it take a different building approach. One shack is "tar-paper", another clapboard, another scribed siding. You'd be hard pressed to find a better deal! (or more useful structures) *This is the tool shed used in our Garden Diorama. See page 329.*

R.J. MOONEY CO
Plumbing Emporium

R.J. MOONEY Co. Plumbing Emporium

This kit was based on a Bob Hayden article many years ago... originally called the "8-Ball Locomotive Works". This is a small but HIGHLY detailed structure... lots of castings... lots of parts... requires lots of time... DEFINITELY not for the novice!

BM0824 O-Scale 'R.J Mooney Co' Plumbing ... \$154.95

See our web site for specific size dimensions.

Jebediah's CARRIAGE & WHEEL REPAIR

Jebediah's CARRIAGE & WHEEL REPAIR

This is a fun and simple kit. The multi-angled roof line adds interest and dimension. The front door may be left open to detail the interior. Kit includes both the structure and ore wagon.

BM0114 Jebediah's' Carriage Repair O-Scale ... \$79.95

"SWANSON'S" Lunch Stand

This little kit is typical of not only lunch stands but of any small vending operation... anything from watermelons to flowers and fresh produce are displayed along roadsides all over the U.S. in this typical setting. Easily built, the kit is complete with some interior details, some castings, and the billboard as shown.

TOWN-LINE TIRE & BATTERY kit comes complete with everything from stacks of tires to a "Coke" machine. With our ever-growing line of O-Scale structures we've made a commitment to provide even more interesting and useful kits in an effort to offer what we feel is one of the finest selection of scale model building ever offered in 1/48. Laser-cut windows, rafter details and appropriate color/black & white signs are all part of this offering. This kit definitely deserves a "foreground" location on your layout. Footprint of this model is 12"W x 7"D. Vehicles & figures are NOT included.

BM0604 TOWN-LINE TIRE & BATTERY Kit \$99.95

HINKLE'S PACKAGE STORE

This little "package store" comes complete with everything from window signs to a fire hydrant. We tried to keep this one "simple", making it a quick & fun-build for modelers of almost any modeling skills. A small footprint combined with colorful graphics & an awning help to make this type of structure versatile... whether using it in a small eastern town or a "narrow-gauged" setting it's generic enough to look right at home pretty much anywhere. The figure does not come with the kit... but anything from the mailbox to the sidewalk does.

Bar Mills

This two-building kit has a "flexible footprint", it'll fit just about any space (and can even be broken up into two separate scenes!) It has all the usual Bar Mill "goodies" along with some severely "cool" engineering that combines all the highly detailed accessories with two versatile track side structures. From the stacks of strip wood lumber to the "sheets of plywood" everything you see is included. This kit is for the medium-advanced modeler.

Order **BM0424**

\$89.95

The footprint is 11 1/2"W x 7 3/4"D. BUT as we said, the two structures can be re-arranged if need-be to fit areas of varying dimensions.

CURRY'S MERCANTILE

**O-Scale
Laser Kits**

Curry's has some cool architectural elements and more than a smattering of modeling challenges. Complete with several detail castings and some cool graphics. With the addition of the "Sidewalks-In-A-Snap", the ornate upper story windows and a unique roof treatment, we knew we could come up with something special... not something "goofy" or "over-fantasized"... but something unique and realistic enough to find its way onto the finest layouts.

Fenster's FARM FRESH O-Scale Produce Wholesalers

There's more to this "simple" little building than you might think! From the store window to the brick loading dock supports we've taken a "lighter" approach to this kit and we think it works! The kit contains almost 30 white metal castings & measures almost 16" long! We theme this example for a farm store but this structure could easily find its way to a small town freight depot, rural transfer facility or dry goods store or any of several other concepts! Footprint: 16" W X 5 1/4" D.

"Sweaty Betty's" O-Scale Diner

This kit has some unusual features. Aside from a great roof sign (even an air conditioner) it features "screen" doors (you can't see them in this photo) as well as some colorful artwork to help make this building an eye-catcher. On a side note this kit got it's name from a place that actually exists. Trust us when we say it was the "locals" that gave the place its nickname and not Betty ! Footprint measures: 12½" W X 5¾" D.

Order #BM0344 **"Sweaty Betty's" O-Scale Diner Kit** \$119.95

BULL'S SALVAGE

Bull's Salvage Kit features *All the "Junk" ... All the "Grime" ... All the "Fun"* that you'd expect from a Bar Mills Kit. **Bull's** is loaded with lots of laser-cut details... from 'scrap windows & doors' to pallets & stacks of steel girder! Also included is an "Insta-Fence", color graphics and white metal detail castings. Not terribly difficult but definitely more than a few steps "up" from what you'd expect from a kit of this price ! Kit footprint measures: 7½" W X 11½" D.

Order #BM0454 **Bull's Salvage Laser Kit** \$89.95

AMOS CUTTER

A general store that belongs as much in the "West" as it does in Boston! The laser-cut "bay window" is what this one is all about, combine that with the generic simplicity of a general store & you have a building that can be used for anything. Details such as soda machines, garbage pails, & more can be added to enhance your scene. Footprint measures: 6¾" W X 7¾" D.

BM0504 Amos Cutters General Merchandise .. \$89.95

Crossing Shanty

You can't get any closer to the tracks than a crossing shanty. This building is so generic there's almost no railroad it wouldn't look right on, and with the additional castings an entire scene couldn't be easier to create.

**Earl's
OIL CO.**

"Earl's" is typical of small fueling facilities located throughout the country. This one is available in both S & O-Scales. Although the building is the main feature, please be aware that there are all kinds of other 'goodies' with this kit. Included are resin cast tanks, fencing and billboard. The scene can be "shaped" to fit anywhere on your layout. This kit is especially good for filling in areas that are difficult to scenic... like the areas between and next to turnouts.

SHADY GROVE TEXACO

SHADY GROVE TEXACO This tiny structure is perhaps the most charming Bar Mills has ever made! Modeled after a real existing service station in Glenn Burnie, MD no detail is lacking. This easy-to-build O-Scale kit includes all the "goodies" you see here (except the red truck) The small footprint allows placement almost anywhere on your layout. Tuck it away in a quiet rural setting or place it in a busy town center. Measures 5"W x 5 1/2"D. Weather it up to a grubby station or clean it up to a fine outstanding petroleum establishment.

Weathered Gray Shingles

Laser Cut "Shake Style" Shingles

Paper-based models have been popular in Europe "forever". While the regular line of Bar Mills structures always include some form of laser-cut roofing, this version of the "shingle" is "printed", and then "laser-cut"... The results are consistent, and with a little extra "dry-brushing" & detailing the shingles can be given even more of a craftsman-type look! Available in two different base color patterns; Weathered Gray & Bark Brown! Cut area measures: 8"W x 10". (contains 24 - 8-inch rows). Glue is required.

Unpainted Resin & Metal Castings

Painting & Weathering Detail Components

It really isn't hard. It just takes a little practice. Volumes have been written but actually making something look weathered takes just a few steps. First, paint the part a base color. Usually the original color as if it was new. Second, brush a thin wash of 40z. of denatured alcohol and a drop or two of india ink. Apply multiple coats for a darker look.

Cedar Fence *Old Split Rail 'Stake & Rider'*

Naturally weathered cedar stakes and riders fully assembled and detailed. (We've done it all for you!) The fence's footprint is laid out in the classic zigzag pattern. Handcrafted using real rough-cut cedar and stained to a natural weathered look. Sections measure 6" long x $\frac{3}{4}$ " high to the top rider. Ends have varying rustic grasses, flowers and vines.

The **New Gate Section** has a non-swinging gate. The overall length is 7" w x $\frac{3}{4}$ " h. (The arch opening is 2" wide x 2 $\frac{1}{2}$ " high.)

What is a Stake & Rider Fence? A rail fence assembled without the use of post holes, as follows: two stakes are crossed, forming a crotch near their upper ends; a horizontal rail (called the rider) is supported by the crotch, then this assembly is bound together at the crotch; a series of such assemblies is required to form the fence, often with additional horizontal rails below the rider.

Old Time Wishing Well O-Scale • Weathered & Assembled

The **Ol' Wishing Well** is a classic detail that fits in just about any rural or farm setting. This rustic wood timber well comes fully assembled, stained and weathered. For an extra touch we use **Bar Mills' Bark-Brown Cedar Shake Shingles** on the roof. A cast resin simulated wooden pail comes also. It too is painted and weathered. The wishing well measures: 1 $\frac{1}{4}$ " x 1 $\frac{1}{4}$ " at the base. It stands 2" tall. Add your own rope around the spool for the hand crank. *Not included is the Amish or Mennonite figure. She is part of our **Pennsylvania Dutch** collection from Preiser. (see page 301 #PR65330)*

O-Scale Crop Rows

NEW!
SILFLOR

O-Scale Crop Rows

Hey, the guys at Silflor just released **Crop Rows** in O-Scale! After a long search to find the perfect combination of true-to-scale appearance and ease of installation, they have developed this simple and effective new material. It begins with a flexible base and then adheres a static grass flock using the secret "Silflor® Static" process that makes grasses like alfalfa and wheat appear to grow vertically.

Soy Beans & Potato Leaf Rows

Rows of leafy vegetables are made by adding tiny leaves to the static grass stalks creating rows of leafy lettuce, potatoes, soybeans and sugar beets. Sets contain 11 rows, each 8½" long. Widths will vary naturally. Every set contains enough material to make on average an 8½" x 8½" planted field.
